- 1 Open Greens logo
- 2 Google maps with all gardens, current garden has different icon. All icons are clickable
- 3 General info about garden with links to related info
- 4 All the plant instances (the actual plants) in this garden with possibility to delve deeper into background and growth of each plant. Links to project the plant is/was part of and attached sensors. Timeline is something that has to be looked into, could be a nice graphic presentation.
- 5 Animal occurrences in this garden with data about each specific species. Might also contain links to background information. Needs further development
